

Admissions Cycle

Understanding the Admissions Cycle:

The MSM program admits students on a rolling basis as application files are completed. We do not wait for the application deadline or a specific date to announce decisions.

Upon receiving application materials, the MSM office will send one e-mail regarding the status of your file. Further correspondence must be applicant initiated.

Decision Timelines:

The MSM admissions committee will review the application file only when the application file is complete. A decision will be made shortly after review. You will be notified of your admission decision within 2-4 weeks by email. Please understand our office is very busy. In addition to handling recruitment, questions and admissions, we are also working with over 150 of our current MSM's.

International Applicants:

Decisions will only be made ***AFTER*** the Graduate Admissions office has reviewed and certified your transcripts, diploma, test scores and any other official documents. This may take up to 8 weeks, so early application and submission of materials is in your best interest with regard to planning for I-20, visa, travel, housing and other important issues involved in attending a U.S. institution. Please carefully review the entire MSM website for all pertinent information.

Application Hold:

Rather than deciding to admit or deny, we may decide to place an application on hold for a period of time. If your application is placed on hold, you will be notified by email. Some applicants may be granted an admissions interview.
