Alternative Futures for Energy and Telecommunications

Historically, technological and demand conditions in infrastructure industries led to state and federal regulation. Changes in those basic conditions have caused some policymakers to change the rules to facilitate the introduction of competition into segments of the market. However, the transition to new configurations of firms and products has proven to be far more complicated and/or disruptive than anticipated. Actual industry performance under deregulation is causing us to review how market structure leads to favorable and unfavorable outcomes. The purpose of this Conference is to explore whether previous visions of deregulation are reasonable, and to learn from the experiences of others.

Sanford V. Berg, Florida Public Utilities Professor

THURSDAY, FEBRUARY 22
University of Florida Hotel - Ground Floor

12:00-1:30 pm Registration and Refreshments

PLENARY SESSION

1:30-1:45 pm John Kraft, Dean, Warrington College of Business Administration Welcoming Remarks

Presentation of Gerald L. Gunter Distinguished Service Award

Presentation of PURC Distinguished Service Award to Roger Noll

1:45-2:30 pm Roger Noll, Morris M. Doyle Centennial Professor, Stanford University Transitional Deregulation: Recipes for Frustration?

2:30-3:15 pm Richard O'Neill, Chief Economic Advisor, Federal Energy Regulatory Commission A Funny Thing Happened on the Way to Energy Deregulation

3:15-3:45 pm Discussion
