Dan O’Rourke is a managing director at Goldman Sachs in New York where he is the Equities Risk Manager. His group is responsible for understanding and analyzing the risks of the firm’s global equity securities and derivatives positions. Dan joined the firm in 1989 in the Equities Division’s trading and arbitrage department. He managed the US equity options trading business until 1995, when he relocated to London to manage the European derivatives trading desk. In 2000, he moved to Hong Kong as head of Equity Derivatives Asia. During that time, he was responsible for Goldman Sachs’ involvement in the creation of the new ISE electronic options exchange. He is a member of the Philadelphia Stock Exchange board of directors and serves on advisory committees to the American Stock Exchange, International Securities Exchange and Securities Industry Association Options Committee. Dan earned a BS degree in Physics and an MBA from the University of Florida in 1986.
