Caryn Schindler

I am a transfer student from Santa Fe Community College and have attended the University of Florida for a year now and I am in love with it. Ever since I was a little girl I had always wanted to attend the University Of Florida and I was determined to achieve my goal. The proudest moment of my life as of this moment was when I received the acceptance letter into UF. Since I have been at UF I have changed my major from a general business major to a marketing major thanks to Mr. Lutz. I took my first marketing class two semesters ago with Mr. Lutz and ever since then my life has revolved around marketing. I love every aspect of it; whether it is doing research, advertizing or creating a new product.

While taking classes at UF, I started to work at Tutoring Zone part time and I became the historian of the Business Gators Association. In addition, I have now concluded an internship with Tires Plus for managerial training and intend on working for them along with Tutoring Zone in the fall. For my remainder year in college I would like to meet new people and continue to network along with being apart of something important. After I graduate college I will either work with a company for a couple of years and then go for my masters or take off for a couple of months and then start to study for my GRE.
