

**What are "Electronic Platform" courses?**

A professor presents the lecture in a TV production classroom and the lecture is video recorded. After the lecture is finished, the video of the lecture is broadcast on the internet via web streaming. Students can then watch these lectures on their home computers or at any of the numerous computer labs on campus.

**What does "electronic platform" mean for you?**

Electronic platform is a great and convenient method for learning. Students have the opportunity to see the class taught by the professor in the "live section" and can then watch it on the internet three weeks later, when they review for their exams. In addition to the lectures, there are TA's (Teaching Assistants) available. These TA's are upper level students who have done very well in the class and have been selected by the instructor to assist other students. We encourage exchange students to take advantage of the free services provided by the TA's during their regular office hours.

**How can you find the live lecture for electronic platform courses?**

Students can find the day, periods, and classroom for electronic platform classes on the "MyHeavener" web page: <http://warrington.ufl.edu/undergraduate/myheavener/videolectures.asp>

**How are students tested in these classes?**

Students will typically have 3 or 4 exams per semester in each class. Generally, these exams are offered in a multiple-choice format taken in a two-hour time period.

**At the University of Florida there are no "re-sits" for exams.**

You should be prepared to take each exam at the time it is scheduled and not expect to retake it if you are unsatisfied with your grade. The professor on an individual basis will handle emergencies. All academic policies will be explained at the start of the term.

Electronic Platform Course	Skill Sets
MAN 3025: Principles of Management	reading/memorization
MAR 3023: Principles of Marketing	reading/memorization
BUL 4310: The Legal Environment of Business	heavy reading/memorization
