State of the College Warrington College of Business Administration Past and Future Funding Needs May, 2004

I. The College has attained national standing in terms of faculty and research productivity and regional prominence in terms of programs. The research productivity of several of the College's Departments (Economics, Finance, Marketing, Management and Decision and Information Sciences) has been accorded "top ten" status by various studies. Likewise, elements of the program portfolio (MACC, PHD, internet MBA) have received similar acclaim.

The College has most of the necessary elements needed to be recognized as one of the ten best public business schools. It is well-positioned to engage programmatic and research opportunities that will put it in the top decile. In the current dynamic environment, the College must be able to make progress toward this goal or it will regress – there is no equilibrium position in this competitive setting. However, the resource base of the College can not and will not support the current level of operations much less any expansion. Unless we can find a new paradigm for funding, the progress made will be lost and the potential will not be realized. A recent survey of our peer schools as set forth by AACSB provides the basis for these observations (Attachment 1.0).

It is evident from the data that the College is the most efficient and most productive among the sixteen schools reviewed. The College's cost of production (state budget/degrees) is the lowest while its output/faculty (SCH/faculty) is the highest. However, the data also supports the observation that the College is stretched to the breaking point.

In comparison:

- 1. The College's budget (state and total) is in the lowest quartile of the comparative group and the state component (\$23,889,530) is nearly 20% below the average (\$29,099,804).
- 2. The College's State budget per degree is the absolute lowest of the peer group and \$3,268 lower than the next lowest peer school. This represents a deficit of \$7,496,795 based on the most recent total degree number of 2,294.
- 3. As noted, the state contribution to the College's total budget is one of the lowest in the comparative set and there has been virtually no growth in that component, except for the BANK years, over the last 15 years. On the other hand, the revenues generated from tuition, fees, and FTE funding by the College have grown significantly. It is estimated that the College generated approximately \$54.5 million in 2003-04 (Attachment 2.2). Over 65% of these revenues are distributed to other parts of the campus.
- 4. It is interesting to note that the College is far more productive (degrees/faculty) than any of the other research universities in the State and yet the funding (budget/SCH) is next to the lowest in the State. For example, Florida State University produced 370 SCH per

faculty as compared to the College's number in 02-03 of 756 and the degrees per faculty likewise reflect this productivity dominance (12.8, FSU; 23.4, UF). On the other hand, the funding for this productivity [FSU, \$374.05 of state funding per SCH; UF, \$322.19] reflects the anomaly of "paying more for less." If we were funded at the FSU rate our state budget would be $74,147 \times 52 = > $3,855,488$ higher than its current level.

As a consequence:

- 5. The limited budget per degree results in a significant shortfall in resources required to provide an appropriate level of student services. At present, all of the College's state budget is required to fund and support the faculty, staff, and PhD students. All funding for operations, programs, and technology comes from non-state resources.
- 6. The increasing faculty reputation has resulted in a number of matching offer situations (25 in last 5 years) which have required substantial rate (\$500,000). In addition, the College suffered a \$1.5 million budget cut that has not been restored. The \$2.0 million decrease in funding not only exacerbates the need for non-state funding for operations, but it has also left several unfunded faculty positions.
 - a) DIS (2 positions)
 - b) Finance (1 position)
 - c) Economics (1 Eminent Scholar, 1 matching offer funding privately)
 - d) BEBR (1 position)

Without additional funding, faculty must continue to decrease. The rate from any positions that might come open will be required to fund matching offers so the unfunded total will increase.

II. In Part I, the evidence of a fiscal crisis was presented. This part offers a roadmap to the solution process with specifications as to amounts and timing.

To reiterate two salient points from the problem exploration, the College produces more degrees per faculty than any of the relevant comparators and receives significantly less funding per degree as compared to the same group. Continuation of this position in the current competitive environment is not tenable and without an infusion of resources the College will experience faculty loss, program denigration, and ultimately revised aspirations. The good news is that these outcomes are preventable and the staged funding suggestions offered later in this paper offer achievable solutions.

It should be noted that the College has been able to maintain its national standing by its success in generating off book revenues, private monies, and contracts and grants. The College's endowment is 1.5 times as large as the comparators' average and generated \$5.7 million in income in 2002-03. The executive degree programs have grown rapidly and the related revenues were over \$5 million in 2002-03. Contract and grants income was \$2.6 million for the same year and has had little change over the last ten years. Unfortunately, while these sources can help

with funding problems in the short run, they are not appropriate substitutes for state funding in the long run.

- 1. The "public" College of Business requires appropriate public support. Private funds are expected to be used for enhancements and not basic services. If the latter case becomes evident, donors will go elsewhere.
- 2. Revenue generating programs move the College perspective into the "for-profit" domain and this is not sustainable to any large extent for a public, Research I, College. The short run contributions could be enhanced by a reduced tax (most of our peers keep all of these revenues), but in the long run a proliferation of these types of programs will threaten the research foundation of the College and, of course, will be at the mercy of the market.
- 3. Increases in C&G funding have been slow to evolve and although the College has not been an enthusiastic seeker of such funds it is second in C&G funding per faculty in the peer set. These activity-specific monies provide specific and directed support but a limited amount of discretionary or program general funds, which the College needs.

The state funding necessary to maintain and to progress are delineated in the following timeline/amount description (funding needed is recurring and additive).

1. Stage 1 (Immediate) - \$2.0 Million

In order to maintain current faculty size and quality, which is a necessary condition for programmatic and research excellence, the College needs an infusion of \$600,000. These funds will allow the College to fund six unfunded or under funded positions, including a vacant Eminent Scholar Chair and permit the College to move faculty from private funds/revenue funds, which we have had to use to meet program needs and matching offers in the absence of any rate available. The balance (\$1.4 million) will restore the operating funds displaced by budget cuts and permit revenue and private funds to be used as intended – enhancements.

2. Stage 2 (2 years) - \$6.0 Million

The critical nature of the state under funding of the College is evident when it is noted that the state funding per degree for the College was \$3,200 less than the next lowest college in the comparative set. To bring the College up to these minimum standards would require an increase of about \$7.5 million. These are necessary funds for the support and flexibility consistent with a "top twenty" College of Business. These funds will allow the College to pursue initiatives in international and interdisciplinary studies, diversity in faculty and students, increased support of the undergraduate program and growth in the graduate program. This request should also be understood in the context of a possible change in leadership, given the change in President and Provost and the end of the current Dean's commitment. There could be a search for a new Dean in 2005-06. However, the probability of completing a successful Dean search is largely contingent on the commitment to Stage 1 and 2 funding. Otherwise, the prospects for the new Dean would be daunting with no operating money, no resources to hire new faculty, and limited

options to expand private giving and revenue generating programs. Good dean candidates are scarce and will not take on a task with limited upside possibilities. Several AAU schools are in their second year of searching for a dean.

3. Stage 3 (3-5 years) - \$5.0 Million

The previous stages provide funding for maintaining the College's current position which is a "mixed bag" of good and excellent. In order to move to excellence in all domains as well as "top ten" standing, the College needs an additional \$5.0 million that would be largely dedicated to graduate programs to add staff, faculty, services, and tuition waivers. Recent rankings of MBA programs has reaffirmed the strong positive correlation between funding available and program standing. We have the smallest MBA program among our peers and to attain the critical mass necessary for improvement, more funding is required. Currently the College has less than \$300,000 to commit to graduate programs outside of PhD stipends. The substantial increase required will allow the College to be nationally competitive (Attachment 3.0).

It is important to note that these requests are made in light of the fact there is a current revenue/budget surplus generated by this College of \$30 million. What is requested is not a University subsidy but a more reasonable distribution of funds generated by the College for the University or a percentage in line with our peers (60-70%) rather than the current 40%. As noted, there is no equilibrium option. Either we make progress in solving these fiscal issues or we will regress. We have excellent and well recognized research faculty with outstanding PhD placements. With an investment we could be among the best nationally. However, our peers will be quick to take advantage of our situation and the resources quality consistent with excellence will be lost to the College.

Budget model - Version 2

The Provost has rejected the budget model (request) included in the State of the College memo. The University (atc) does not have the funds available to accommodate our requests irrespective of the validity of our needs.

The College will propose a different budget model to the Provost in the next few weeks. This model is based on the productivity of the College as measured by SCH and the tuition funds that result from that productivity. The model would supercede the current model which is based on "what you got last year plus/minus". It would be more predictable and more sensitive to the decision of the College. A stylized example is attached.

New monies generated by the model would be dedicated to (in order):

- 1. Funds needed to maintain current faculty size;
- 2. Funds needed to bring faculty count back in equilibrium;
- 3. Funds needed to recapture lost operating budget;
- 4. Funds needed to expand the faculty to accommodate increasing SCH productivity.

A performance-Based Budget Proposal for the Warrington College of Business Administration

This budget proposal is based on the College's performance on the tuition and fees revenues.

ON-BOOK PROGRAMS

- 2004-2005 budget is the base budget
- Budget increases in the future years will come from three sources
 - o Increase in tuition and fees
 - o Increase in Total weighted student credit hours
 - o Salary raises
- How the College budget is computed for future years is detailed in the attached worksheet.
- For the On-book professional programs, the College keeps all the revenues and pays the legislative fees for the students enrolled in these programs. Legislative fees for 2004-2005 are \$14.35 and \$45.60 per credit hour for in-state and out-of-state students, respectively.
- The University keeps all the FTE funding generated by these programs

OFF-BOOK PROGRAMS

- College keeps all the revenues generated by these programs and pays a 4% overhead fee to the University (DOCE)
- From these funds, the College deposits \$600,000 annually into a "building reserve fund" for the Graduate Studies Building

	-	_	-	
INI ()		_	-	۰

- 2) CWOC stands for "Center for Written & Oral Communication" and refers to the writing/speaking courses.
- 3) Includes OPS payments and salaries of MBA staff solely attributable to external MBA programs. If such programs dissolved, these payments/salaries could be eliminated.
- 4) Business Information & Technology Services staff salary support.
- 5) Assumes MBA staff working weekends in Miami are compensated with a \$500 lump sum payment per trip.
- 14) Assumes \$12,000 assessed to MBA external programs for server access and software licenses plus \$7,500 annually for Centraweb. Internet programs also include \$2,300 per student for laptops.
- 15) Assumes 3 people (2 faculty, 1 staff) travel to Miami 35 times at \$1,000 per person per trip.
- 17) Assumes 80% of overhead costs are attributable to external MBA programs.
- 18) Assumes 70% of marketing, admissions, and alumni relations costs are attributable to external MBA programs.
- 19) Provost tax assessed on off-book programs.
- 21) Tuition for each program is as follows:

EMBA	\$32,000
ESMBA	\$27,000
P2MBA	\$27,000
P1MBA	\$23,000
SFMBA	\$44,900
I2MBA	\$37,000
I1MBA	\$32,000

- 22) DOCE is required to return annual interest income to auxilliary accounts. The percentage varies, but for these purposes is estimated at 2% of revenues.
- 27) Assumes 43 summer research grants are awarded at \$25,000 each.
- 28) This is the amount of state salary budget used to support external MBA programs. It is the difference between the actual amount of staff salary (including Traditional MBA and other MS/MA programs) of \$673,089 paid from DOCE and line item #3 (MBA staff salaries & OPS directly attributable to external MBA programs) of \$542,804.
- 29) Salaries/OPS for lecturers teaching writing and speaking courses in Traditional MBA & MS/MA programs.
- 30) Assistantships/scholarships awarded to Traditional MBA students using DOCE funds.
- 31) OPS payments/scholarships awarded to MS/MA students using DOCE funds.
- 32) Overhead costs attibutable to Traditional MBA program (estimated at 20% of total) plus College insurance costs.
- 33) Marketing, admissions and alumni relations costs attibutable to Traditional MBA program. Estimated at 30% of total.
- 34) Traditional MBA student services budget.
- 35) Career services budget for Traditional MBA, MS and MA programs.
- 36) College expenses supported out of DOCE.
 - 12-Jul-04

Average Cost of New Assistant Professor

2003-04 Fees

Nine month salary	\$135,000
Fringes (33%)	45,000
Summer Support	25,000
Expense Budget	7,000
Overhead (23% salary & fringes)	43,000
	\$255,000

Assuming the faculty person teaches three classes per year the maximum and minimum revenue generation counting tuition and FTE funding are:

a. Three graduate classes (3 credits) (averaging 32 students) assuming a mix of 25% out-of-state and 75% in-state students yield a total revenue from tuition and FTE of:

\$235,115

b. Three undergraduate classes (4 credits) (averaging 40 students) assume a mix of 8% out of state and 92% in-state yield a total revenue from tuition and FTE of:

\$157,078

c. The results are that offering undergraduate electives with tenure track faculty produce a loss of almost \$100,000.

The above numbers are offset by:

- a. having larger class sizes;
- b. the electronic platform subsidy;
- hiring lecturers to teach undergraduate non-electronic platform courses;
- d. subsidies from off-book programs, gifts, and endowment income.

We need to be aware of this problem and manage faculty time appropriately.

- a. While some faculty teach more classes on average, others are teaching less. The College's mean has remained stable at 3.0 to 3.2 for a decade.
- b. The costs will continue to rise as we shift to more junior faculty with a research productive senior faculty.
- c. Overall, costs will increase since many of the retiring faculty have lower nine-month salaries.
- d. Given the emphasis on research, it is unlikely that teaching loads will increase.

MEMORANDUM

TO:

David Colburn

c/o Intuitional Research Office

FROM:

W. Andrew McCollough

SUBJECT:

National Comparisons for 2003-04

The College has compiled a number of documents and data to compare our operation with our AACSB affinity group (peers). In addition, we have included current ranking information as presented in academic and general interest publications.

We have also submitted the data electronically to the Institutional Research Office. Please contact me if you have questions about this matter.

FACULTY

The faculty have garnered evidence of peer and other evaluations not only in the ranking information that is summarized elsewhere but also in the recognitions afforded them.

Grants

The College's mission does not stress production of research and/or teaching units that will attract grants and contracts. While the applied side of research is an important part of the research output, that path is one that is chosen largely by faculty interest rather than funding sources. However, the fact is that the faculty research agenda has attracted an increasing amount of contract work.

The contribution of this source to the funding of the College has doubled over the last five years and now stands at about \$4.5 million. Approximately 10% of the faculty have been grant recipients during this period with amounts averaging over \$400,000.

A College goal is to increase participation rate to 20%+ and funding to \$10 million.

Awards/National Offices

Again the reputational aspect of the faculty's professional activity is reflected, in part, by peer recognition through awards and national offices. The awards and recognitions that have been generated by the faculty over the past five years are many and varied to include:

Seminal Educator in Accounting (J. Demski, Accounting)

Educator of the Year, Marketing (B. Weitz, Marketing)

President's Award for Excellence (S. Berg, Economics)

Isord Award for Distinguished Scholarly Achievement (C. West, Economics)

Best Interdisciplinary Paper, Decision Sciences Institute (A. Vakharia, DIS)

Distinguished Scholar Award, SFA (J. Ritter, Finance)

Ralph Burche Award, Best International Law Paper (V. Maurer, Management)

Best Paper, 2002, Journal of Operations Management, (J. LePine, Management)

Outstanding Tax Educator, American Tax Associate (J. Kramer)

Best Article, 2003, Journal of Consumer Research, (J. Alba, Marketing)

Distinguished Early Career Contributions Award, 2004, Society of Industrial and Organizational Psychologists, (J. Lepine, Management)

This list is representative of the public recognition that the faculty have achieved for their efforts. In fact, over the last five years there have been a total of 35 awards bestowed on the faculty or an average of 1+ per department per year.

In addition, a number of faculty have been asked to serve as officers of their professional associations. In fact, several served as president or chairman of their organizations to include:

AACSB-International, Chairman (J. Kraft)

Association for Consumer Research, President (J. Alba)

American Marketing Association, President (B. Weitz)

Informs, National Conference, Chairman (G. Koehler)

American Real Estate and Urban Economics Association, President (D. Ling)

Financial Management Association, President (M. Flannery)

Academy of Legal Studies in Business, President (G. Maurer)

American Association of Accounting, President (J. Demski)

American Tax Association, President (J. Kramer)

At any point in time, it would appear that about 25% of the faculty are serving their profession in some capacity at the national level.

Publications

Every tenured faculty has some involvement with the professional publications of their discipline. That participation ranges from reviewer to editor and for many faculty the participation is across several publications. In fact the average service of this sort per faculty person is now 2.0+. The Editorship of several publications has also resided in the College to include:

Journal of Public Policy and Marketing (J. Cohen)

Review of Development Economics (E. Dinopoulos)

Southern Economic Journal (J. Hamilton)

Journal of Economics and Management Strategy (D. Sappington)

Journal of Marketing Research (B. Weitz)

Marketing Science (S. Shugan)

Journal of Money, Credit and Banking (M. Flannery)

Journal of Financial Intermediation (C. James)

Real Estate Economics (D. Ling)

Journal of Corporate Finance (M. Ryngaert)

European Journal of Operations Research (S. Erenguc)

American Business Law Journal (V. Maurer)

Traditional MBA Programs
MBA Rankings: Analysis and Strategy
May 13, 2004

I. Summary

On April 1, 2004, The University of Florida's MBA Program fell from #27 to #53 in the 2005 U.S. News & World Report's annual Traditional MBA Program rankings. These rankings are based upon data compiled from the TMBA graduating class of 2003 and the matriculating class of summer and fall of 2003. Executive and Professional MBA student data is not factored into these rankings. It is important to note that, although we consider our TMBA program a significant component of our enterprise, it represents a small fraction of our enrollment; 2% of the total WCBA enrollment and 12% of the WCBA graduate enrollment. The chart below compares our 2003 results with top 50 MBA programs that appeared in the 2005 US News Rankings.

Assessment	UF Data 2003	UF Rank Top 50 2003	UF Data 2004	UF Rank Top 50 2004
Peer Assessment (25%)	3.4	#36	3.3	#35
GMAT (16.25%)	658	#28	650	#41
GPA (7.5%)	3.3	#32	3.23	#45
Selectivity (1.25%)	23%	#23	44%	#45
Recruiter Assessment (15%)	4.1	#13	3.1	#49
Starting Salary (14%)	\$65,757	#50	\$64,200	#50
Placement @ Graduation (7%)	57%	#41	34%	#50
Placement @ Three Months (14%)	91%	#4	86%	#7

II. Variables Defined

The variables that determine the overall U.S. News and World Report ranking of MBA programs are grouped into three areas:

Input variables (25%)
Output variables (50%)
Overall quality variables (25%)

Input Variables (25%):

The input variables are characterized as <u>student selectivity</u> and include GMAT score of entering students, GPA of entering students, and acceptance rate of the entering class. The relative weights in this domain are:

GMAT (65%) GPA (30%) Acceptance Rate (5%).

Our average GMAT for the entering class declined from 658 to 650. This drop caused our overall GMAT rank to decline from #28 to #41. There are several reasons for the decrease:

- 1) Several of the higher GMAT applicants that had been admitted went to other schools because of scholarship or assistantship availability. The number of applications to traditional MBA programs at our peer group is declining nationally which means more competition for the best students.
- 2) We admitted more students in 2003 with the objective of increasing our class size to attract more recruiters. The quantity emphasis moved this quality attribute down slightly.
- 3) Upon request, we admitted some less qualified applicants. With a small class, a few outliers can make a big difference. For example, an applicant with a 550 GMAT in a class of 50 reduces the GMAT average by two points and with two or three of these applicants, you lose six points.

Our average GPA for the entering class fell from 3.3 to 3.23, for reasons similar to the GMAT drop outlined above. This drop caused our overall GPA rank to decline from #32 to #45. While our acceptance rate also declined in 2003, it had little on the final score (acceptance rate (.05)(.25)=1.25%)

Output Variables (50%):

The output variables are characterized as recruiter assessment (30%) and placement success (70%). Recruiter assessment is compiled from a survey completed by a College-selected group. The assessment number for 2004 was 3.1 as compared to 4.1 in 2003. Our ranking in this variable dropped from #13 to #49 as a result of this change. The program size has limited the number of recruiters interested in coming to campus for interviews and that in combination with a low overall response rate (32%) resulted in a small sample for the College and any negative outlier had a disproportional effect on the average.

Placement success is defined as a function of starting salary (40%), placement at graduation (20%), and placement 3 months after graduation (40%).

On two measures, starting salary and placement at graduation, the College continues to be well below top 50. On the other hand, placement after three months is among the best in the group (#7) with only a slight ranking decline (2003-#4) from the previous year. The data suggests that most of our students get jobs but it may not be jobs of first choice and it is likely to be a job in Florida. In fact, 82% of the 2002 placements were in the State, which also undoubtedly contributes to the low starting salaries.

The Florida MBA program is very small compared to the US News top 50. Total MBA enrollment in 2003 was 131 and there is only one program in the top 50 that is smaller (UC-Davis). Average enrollment for the top 15 programs is about 900, and the average for the next 10 and the last 25 programs are 350 and 240, respectively. In addition, of the fifty-one 2003 graduates, only 32 were seeking employment. Representatives from several companies have indicated to the GBCSO staff that our numbers did not provide sufficient justification for their companies to send their recruiters to campus. It appears that our MBA program has limited attractiveness for companies, which recruit MBA's exclusively. However, companies, which are interested in hiring our specialty masters graduates in addition to our MBA's, find UF an attractive place to recruit young talent.

Overall Quality Variables (25%):

The overall quality variable is peer assessment and represents evaluation by Business Deans and MBA Program Directors. The assessment process is by survey to the Deans and Directors of all accredited business schools/colleges.

The College's peer assessment score was #35 among the top 50 and had improved slightly from the previous year's ranking (#36). Reputation beyond the top ten is ill-defined by this metric and many respondents have little understanding of such. They are primarily influenced by University reputation, marketing, and public relations. Better measures of academic impact/reputation focus on research productivity and there we fare very well. In a recent citation analysis (Larry M. Robinson and Roy D. Adler, "Business Research in Eight Disciplines," in Academic Assessments.com). University of Florida's Warrington College of Business was ranked #26, #22, #5, #29 and #22 in Economics, Finance, Marketing, Management Science, and Organizational Behavior, respectively. The rankings for the five disciplines when compared to Public Universities are #11, #8, #1, #12, and #11. An alternative measure might be Ph.D. placements, and again we do well. In the last 8 years our Ph.D. placements included Chicago, Columbia, Harvard, Michigan, NYU, Purdue and Wharton among others.

Summary:

The College's overall ranking was #53 as compared to #27 last year. The variables that had the largest negative impact on the outcome appear to be in the output variables, especially recruiter assessment (25% decrease in value) and employment at graduation (40% decrease in value). These two changes combined with the lowest starting salaries among the top 50 programs swamped the positive peer assessment.

III. Strategy

Over the last several years, the MBA program has been media-ranked in the 45-55 ranges. In the short run, a feasible objective would be top 40 ranking and a top 25 ranking in the long run. With these objectives, the strategies that will be employed and the concomitant resource needs are discussed in the following sections.

Short Run Strategies: Input Variables

Given the applicant pool, some of the input variables are relatively easy to manage. We can determine minimum GMAT scores, GPA's and the major challenge is the class size.

- a) **GMAT scores**. We need to improve our understanding of GMAT/employability correlation with increased emphasis on the latter so as to improve output results. In doing this we need to take a holistic view of employability and take into consideration all the factors that improves a candidate's employability. We need additional scholarship/fee waiver funding to be more competitive with our peer schools. We are also willing to accept up to a 5 point deviation from the 2003 average of 658 to improve employability.
- b) **GPA average.** We need to increase our emphasis on our mean GPA score, as an important input variable behind GMAT and employability. We will target a mean GPA of 3.4, but will be willing to accept up to a .5 point deviation to improve GMAT and/or employability.
- c) Class size. A larger, more employable class size will improve output results. An improved and increased marketing effort will deepen the applicant pool and additional scholarship funding and tuition waiver resources will improve the yield on the best candidates in the pool. In the short term, our strategy will be to use increased scholarship and tuition waiver funding to bring in an exceptional group of approximately 100 students (75% domestic, 25% international) who will make a positive impact on both input and output variables. Our total traditional MBA enrollment in 2003 was 131, which ranked #48 among the top 50 US News & World Report Business Schools. Moderate annual increases in enrollment are feasible with additional resource funding, improved rankings position, increased assistance derived from new MBA alumni relations program, and improved program marketing. Part of the new marketing strategy will be the creation of a Corporate Partners Scholarship Program for our One-year Option A Program (described in section (d) below).
- d) Corporate Partners Scholarship (CPS) Program. Market and promote special CPS program through media, targeted Florida companies, and directly to prospective students. Florida MBA Program will award (20) full scholarships plus living expenses stipend to Florida residents employed at target Florida companies. CPS recipients would meet minimum academic and professional requirements established for this scholarship program (650 GMAT, 3.0 GPA, 3+ years of excellent work experience). In most cases, CPS recipients would take a leave of absence from employer with a guarantee to return in a more substantial corporate role. CPS Program benefits would be numerous, including:
 - Positive press throughout Florida media (Florida's best MBA Program investing in Florida's best corporations and professionals)

- Scholarship program is a gateway to establishing exceptional corporate relationships with leading Florida companies, which will yield TMBA and Working Professional MBA candidates and permanent/internship job placements.
 - Encourages company partners to hire MBA interns over summer from Traditional Two-Year Program.
 - Increases recruiter assessment variable significant value to company
- Increases class size with outstanding domestic MBA candidates
- Improves output variables considerably (starting salary and placement %'s)

Short Run Strategies: Output Variables

All aspects of the program activity that impact the output variables must be reexamined for effectiveness and efficacy. Of course, the input variables (student employability) impact output outcomes and it is expected that the increased emphasis on employability will have beneficial consequences in the output domain.

We must take a serious look at our relevant output market and employ a saturation or dominance strategy. Over 80% of our students have, historically, been placed in Florida/Georgia and this is where we must focus our efforts.

- a) Recruiter assessment. We need to have a personal call on every potential Florida and Atlanta area recruiter. We will know who they are, what they need, and what Florida alumni are currently employed within these target corporations. We will use the latter network more intensely to identify opportunities and to sustain recruiter contact. We will look to drastically increase the number of Florida corporations with which we have an elite recruiting/placement relationship. This will increase the depth and quality of the employer list we produce for US News & World Report, which they directly plug into their Recruiter Assessment model. Additionally, we must find ways to incentivize recruiter participation in the various surveys. The current low participation rate combined with our small class/recruiter number gives too much weight to negative outliers.
- b) Student placement. Our input strategy and recruiter assessment will emphasize Florida/Atlanta placements. Regional wage differential will continue to result in relatively low starting salaries but these should improve with the increased focus and employability. Two Career Services professionals will be assigned to work exclusively with MBA students, vs. all WCB graduate business students. These professionals will adopt an "executive search" model in which each professional will have a group of students for whom they have primary placement responsibility.

Additionally, a new professional position within the Career Service Office will be created. This professional will be 100% focused on building and developing corporate relationships within Florida and Atlanta. Significant travel will be required to call on all potential Florida/Atlanta employers.

The three MBA focused CSO professionals will work together to maximize the number of times that our MBA's are placed in front of potential employers and maximize their ability for

success with each of these opportunities. Our students have told us that they are willing to travel anywhere in Florida/Georgia to interview for opportunities. Given our students' willingness, our small MBA class size, and the attractiveness and convenience of on-site corporate interviews for the employer, considerable efforts will be placed into arranging these off-campus interviews for individual students. We will also look into putting together job fairs/employer days for our students in South Florida and Atlanta. The increased external focus combined with the individualized executive search services will enhance accountability and provide more focused feedback on placement success and failures.

c) Alumni Relations Program. A large component of our placement strategy will encompass developing corporate relationships via MBA alumni. There are over 4,300 UF MBA alumni, who are currently not given any services or attention, and are not being used strategically to improve input or output variables. A significant investment in the creation of a new Alumni Relations Program will produce results in all program areas, most importantly in placement and recruiter assessment. A well-supported Alumni Relations Program will also yield an Alumni Mentorship Program that will improve MBA student professional development and overall student satisfaction. A Working Professional alumni event for fall 2004 in Gainesville is in the planning stage.

Long Run Strategies

Success in the long run will be consistent with garnering the resources necessary to implement these short run initiatives. Presently we have very limited state funding to support our MBA program. We have very limited assistantship, scholarship, and tuition waiver funding when compared with our peers. The program, except for some personnel salaries, is entirely funded by revenue programs and private giving. Our state dollars per student are the lowest among all of our peers. The impact of these limited resources cripples our ability to reach our input, and consequently our output, variable targets.

In order to attract the best inputs, maintain peer assessment, and improve on the output side we must have additional funding.

Additional Resources needed:

Short Term

- Waive out-of-state portion of tuition for all first year non-Florida residents (60 projected) -\$1,000,000
- 2. Graduate assistantships for all 100 second year students \$660,000

At our peer schools, all of which are in the top US News & World Report 50, on the average 43% of MBA students receive full assistantships/fellowships. In 2003 we provided assistantships/fellowships to 10% of our MBA students.

3. Funds for increased marketing and promotion of MBA Program, and MBA alumni/student networking events - \$500,000

In our AAU Affinity Group the number of people employed in the marketing function ranges between 1 and 6 with an average of about 3. Furthermore, some of these schools outsource part of their marketing functions. At the present time we have no personnel employed in the marketing function.

- 4. Additional MBA professional staff \$208,000
 - (1) Associate Director of Career Services (external corporate development)
 - (1) Director of Alumni Relations
 - (1) Assistant Director of Admissions- Professional & Executive Programs

Graduate Business Career Services Office services about 600 specialty masters students in addition to the MBA students. To provide a reasonable level of service to our students we need to add at least one position to this office.

In the above paragraphs, the importance of Alumni relations was discussed. At the present time, the College does not have anyone charged with this task.

We have the largest executive/professional MBA (E&PMBA) program in our AAU Affinity Group* and we have only one staff member charged with the admissions function for the E&PMBA programs. In the 2003-2004 academic year, the average enrollment in the E&PMBA programs for our Affinity Group was 118, and our enrollment was 357. Our E&PMBA enrollment has grown significantly since then, reaching a total of 575. Furthermore, with the introduction of the South Florida PMBA program in October 2004, this number is expected to be around 650. To be able to effectively handle the applications stream, conduct many information sessions around the State and perform follow-up functions to attain the highest yield possible, we need at least one additional admissions staff.

* AAU Affinity Group is a set of peer schools consisting of the following: AZ, CA, UCLA, FL, IL, IN, IA, MD, MSU, MN, OSU, PSU, Purdue, TX, WA, and WI

5. Additional specialty faculty and lecturers to offer a broader curriculum and to accommodate increased class size - \$150,000.

Specialty faculty/lecturers will be used in areas like Entrepreneurship, Communications, and Writing.

6. Funds for renovation of existing classrooms, breakout rooms and other MBA dedicated space - \$100,000

Compared to our peer schools, our MBA dedicated space leaves much to be desired. We are the only school in our Affinity Group without appropriate graduate facilities such as breakout rooms and lounges.

Total of short-term needs: \$2,618,000

Page 8	
	Long Term
1,,	Waive out-of-state portion of tuition for all first year non-Florida residents (100 projected) \$1,520,000
2.	Graduate assistantships for all 160 second year students - \$1,120,000
3.	Funds for increased marketing and promotion of MBA Program and MBA alumni/student networking events- \$700,000
4	Additional MBA professional staff - \$412,000 (2) - Additional Alumni Relations staff (1) - Student services staff (1) - Director of Marketing (2) - Additional CSO staff for Professional MBA student Career Services
	In our AAU Affinity Group, the number of people employed in Alumni Relations, Corporate Relations Public Relations and Marketing ranges between 2 and 11. At the present time we have no personnel employed in these functions.
5.	Additional specialty faculty and lecturers to offer a broader curriculum and to accommodate increased class size - \$350,000
	Total of long-term needs: \$4,102,000 (includes the short-term needs)

New facility with space for classrooms, breakout rooms and placement functions - $\$10,\!000,\!000$

MEMORANDUM

TO:

David Colburn

FROM:

John Kraft

SUBJECT:

2004-2010 Fund Raising Goals and Objectives

The changes to the fundraising team for the Warrington College of Business this year created opportunities to enlist faculty in fundraising and involve the regional and central UF Foundation staff in coordinated fundraising efforts. The success achieved this year is directly attributable to the stability provided by key volunteers like Al Warrington, Gary Gerson, and Fred Fisher; faculty like Ginny Maurer; and especially the patience of our donors with the arrival of new fundraisers.

Assessing 2003-2004

Through June, we'll raise an estimated \$8.7M (not including state match) from 15 major gifts from individuals and corporate friends towards our target of \$11M. We have raised it in the priority areas of unrestricted funds, graduate fellowships, and operating support for our centers of excellence. In addition to outright gifts and pledges, Richard Ahrens's \$1M bequest and Michael Cook's \$500K life insurance policy are included in the \$8.7M total.

In order of the amount of new pledges and gifts YTD:

- New Undergraduate "Warrington Welcome" program \$80K.
- Decision Information Science \$100K for faculty endowment
- Miller Center for Retailing \$450K for operating funds
- Masters in Finance \$500K for program endowment
- Center for Entrepreneurship \$930K for operating funds
- Fisher School of Accounting \$1.385M primarily for unrestricted funds
- Anonymous donor tba next week--\$2.125M for endowment and operating funds

Unrestricted gifts for FSOA, Business, and MBA:

Unrestricted Fund	FY 03	FY 04 ytd
1901 (Business)	\$ 431,511	\$ 216,266
0931 (FSOA)	\$ 105,000	\$ 398,498
3685 (MBA)	\$ 44,389	\$ 28,114
TOTAL	\$ 580,900	\$ 642,879

June 22, 2004 Page 2

In terms of productivity, two fundraisers set a strong pace for the number of face-to-face solicitations and specific proposals, with 72 solicitation visits thru May (the same total as last year) and 28 formal major gift proposals anticipated by year end (vs. 30 last year). Over 20 major gifts commitments are anticipated by June 30, 2004 vs. 2 last year. In addition to solicitation, face-to-face stewardship visits (plus the dedication of Gerson Hall) were important to maintaining donor confidence. We logged 66 face-to-face stewardship calls thru May '04.

The Future:

The number of major gift proposals we do will determine whether donors to the Warrington College of Business set an example campus-wide and lead the way in the next campaign. We have enough highly rated prospects (3,000) and compelling cases for support to play a key role in the campaign...Business has either the most prospects or is a close second to CLAS depending on the rating system used.

The challenge is finding salary support to recruit and retain experienced major gift fundraisers. Setting a fundraising goal for the next campaign and outlining the number of solicitations needed to achieve that goal is a straightforward process. The tough question is how many fundraisers will be on the road for WCOB? Without knowing whether salary support is available from UF (state rate) or campaign staff funding from UFF, it is difficult to set campaign goals. The option of spending over half our annual unrestricted gifts on fundraiser's salaries is not feasible over the course of the campaign.

Note: Staffing for development is lower in comparison to our AAU – Affinity Group based on data from a discussion on April 18, 2004. The group discussed the organization of development and marketing:

	Development	Alumni	Corp/Other	Marketing	PR	Design	Total
Florida	3			0			3 _
Penn State	5	2		1 _	1_	1	10
Wisconsin	3	2		1	1		7
Minnesota	5	3	3	4	2		17
Texas	4		8	3		3	18
Maryland	10	2		4	3		19
Ohio State	5	2	1	2	1		- 11
Arizona	3			4			7
UCLA	8	_ 6	4	6			24
Washington	4	2	2	3	1	2	14
Iowa	2			1	1		4
Purdue	3	1	2	1	1		8

Optimistic GOAL is to close ~180 major gifts from 360+ proposals by 2010. That requires increasing the number of \$100K+ proposals to 60+ proposals/yr using a strategic focus with prospects likely to commit. That level cannot be done by just a Senior Director and Director. It will require one additional Director and a secretary to join the WCOB team in '04-05 and the intense commitment of volunteers, Dean and faculty to raise the sights of alumni and corporate friends.

# Fundraisers	# Solicitation visits/yr	# M.G. proposals/# com/yr.	Total # comm. '04-10
2*	75	30 proposals/15 "yes"	90
3**	115	45/23	138
4**	150	60/30	180
	* one support staff	** two support staff required	

	June 22, 2004 Page 3
	We will focus our efforts on the strategic priorities outlined in the "Warrington College of Business – Past and Future Funding Needs" as submitted to you in May 2004.
	We propose a goal in '04-05 of \$11M if there are two major gift fundraisers working to maintain productivity at levels similar to '03-04. Addition of a third major gift fundraiser would increase this goal.
	We will focus on finding donors to support: Professorships, faculty fellowships, and summer research grants for faculty Ph.D. student stipends MBA student stipends Undergraduate Leadership Academy Center for Entrepreneurship and Innovation Center for Real Estate Studies Other units and centers as determined by prospect interest

Campaign focus through 2010 (these are proposed levels pending approval)

Naming Opportunity (not counting state match)	Gift by 2010
Graduate School	\$25,000,000
Graduate Studies Building	\$ 5,000,000
Professorships (34 total @ \$600,000 minimum gift)	\$20,400,000
Faculty Fellowships (30 total @ \$ 250,000)	\$ 7,500,000
PhD Fellows (30 total \$150,000)	\$ 4,500,000
Bryan Hall	\$ 5,000,000
Matherly Hall	\$ 5,000,000
Center for Entrepreneurship and Innovation	\$ 5,000,000
Under CEI's umbrella, priorities total	\$ 8,500,000
i. visiting professor \$1,000,000	, ,
ii. entrepreneur in residence\$1,000,000	
iii. Gatornest \$2,000,000 (operating funds)	
iv. undergrad minor in entrepreneurship \$1,00	00,000 (operating funds)
v. graduate fellowship 4@ \$250,000 (term \$2	20,000/yr x 3 yr)
vi. Masters in Entrepreneurship \$1,500,000	
vii. Clark Butler Entrepreneur of Year Award S	\$1,000,000
Centers \$3,000,000 each	\$ 15,000,000
(Real Estate; International Business Education and Resear	rch; Bureau of Economic and Business 🔧
Research; Public Utility Research Center; Center for Man	nagement Communications (writing center)
Undergraduate Honors Program	\$5,000,000
Undergraduate Leadership Academy Classroom and Bryan 232)	\$1,500,000 + \$500,000 renovations
Executive in Residence Program	\$1,000,000
Masters in International Business Program	\$1,000,000
Masters in Decision and Information Sciences Program	\$1,000,000
Masters in Real Estate Program	\$1,000,000
Masters in Management Program	\$1,000,000
Naming MBA Program	\$5,000,000
under the MBA "umbrella" priorities total	\$12,000,000
1. MBA Fellows \$100,000 each (50 total)	
2. MBA Admissions Center \$1,000,000	
3. MBA Careers Services Center \$1,000,000	
4. MBA Course Concentrations (4 @) \$1,000,000)	
5. MBA Student Services Center \$1,000,000	
Real Estate School (planning in response to prospect request)	\$10,000,000
Unrestricted gifts \$700,000/yr x 6	\$ 4,200,000
TOTAL GOAL if 4 fundraisers:	\$144,200,000

In the last campaign, \$72M (including state match \$) was raised by 1.5 fundraisers. Looking ahead to the new campaign, raising \$72M (no state match), is a challenging goal for 2 fundraisers.
